

# NEW PRESENCE WALL/FLOOR VC MOTORIZED

Everyone can reach it

Makes it easy to handle large and heavy displays

Do you need to mount large and heavy displays or touch sensitive displays on a regular wall? With a quick, easy and stylish installation too? Presence Wall/Floor VC Motorized takes your videoconferencing to a new level. Presence Wall/Floor VC Motorized combines our unique Presence solution which completely hides cables and peripherals inside the body of the stand, with a smart design that shifts the weight to the floor. This ensures that the stand itself uses very little floor space and you can mount very heavy displays on a regular wall.

It doesn't matter if the user is very tall, a child or wheel chair carried, everyone can reach thanks to the soft motorized height adjustment. The motorized height adjustment is readily available from a button at the side of the unit, behind the displays, and works for most markets (both 110 and 230 V).

Fine adjustment possibilities allows for edge-to-edge mounting of displays. The displays can be locked with the accompanying locking screw for personal safety, or with a padlock (not included) which provides increased protection from theft. The design of the Presence series is protected. Maximum display weight is 60 kg per display.
