

FUNC CEILING EXTENSION PIPES

When you need to reach up

A great solution for a high ceiling

Using Func Ceiling Extension Pipes together with the main product [Func Ceiling](#), hanging a display in the ceiling of a spacious room is no longer an issue. Clever extension pipes in a telescope model will solve the problem, and the length is adjustable in 50 mm steps. The installation will have a neat and clean look, thanks to cables being fed through the pipes. With the help of the longest of the Func Ceiling Extension Pipes, you get a distance as long as 4,5 m from ceiling to center of display. Several pipes can be mounted together, up to approximately 7 meters length.
